BENEFITS

- Conformable and flexible
- Moisture resistant
- Durable
- Hand tearable
- High tack
- Clean removal and re-positionable
- Excellent adhesion to polyethylene and other surfaces

PE7 POLYETHYLENE TAPE

A high performance, durable, moisture resistant sealing tape manufactures to withstand the most demanding conditions. The PE7 is designed to adhere to a variety of surfaces and otherwise difficult-to-bond materials, such as dusty or similarly contaminated surfaces. It is commonly used in building and construction applications, including stucco masking, and in the remediation industry to seal bags and to secure arm/leg openings in protective clothing.
