ANTI-CORROSION

VCI EMITTER PACKS

FLEXIBLE PACKAGING

Each VCI Emitter Pack contains a Vapor Corrosion Inhibitor (VCI) powder which protects ferrous and non-ferrous metals against corrosion, oxidation, tarnish and discoloration.

The packs provide an extremely efficient method for the dry preservation of metal parts within an enclosed space. The VCI vaporizes and then adsorbs on all metal surfaces, reaching even the most difficult recesses and interior voids.

FEATURES & BENEFITS

- Emitter Pack #3 - Protects up to 3 ft³ (80 liters) for up to 24 months
- Emitter Pack #15 - Protects up to 15 ft³ (420 liters) for up to 24 months
- Emitter begins working immediately, filling the package space with VCI protecting vapors
- Metals protected: Carbon steel, iron, stainless steel, copper, brass, aluminum, zinc, silver, and galvanized steel
