# LAMIFOAM

## FOAM WITH FILM LAMINATED BACKING

Polyair Lamifoam combines the cushioning properties of foam with a film laminated to the back side of the foam.

## FEATURES & BENEFITS

- Laminated film layer provides greater resistance to punctures
- Heat lamination as opposed to adhesive lamination for consistent and stronger internal bond
- Enhanced ability to withstand tearing and scraping
- More protection in a smaller warehouse footprint
- One roll of 1/32" Lamifoam has the ability to replace multiple rolls of standard foam

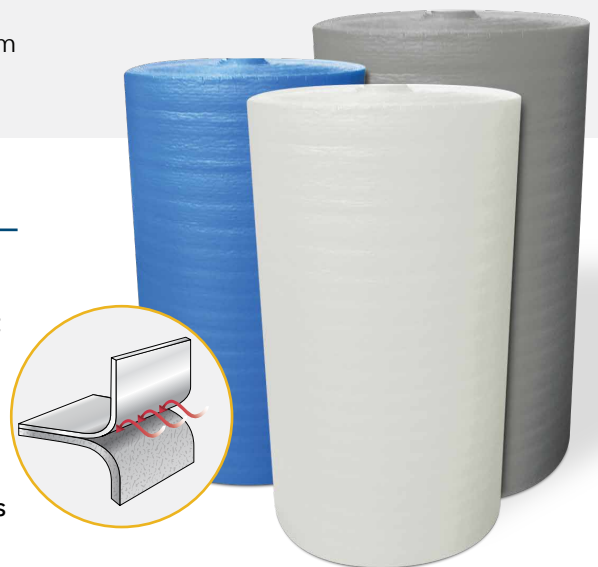

## MARKETS

- Automotive
- Electronics
- Furniture and fixtures
- Manufactured parts

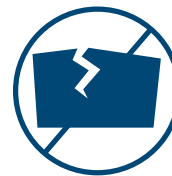

## AVAILABLE SIZES

| FILM TYPE     | COLOR | FOAM          | WIDTH      | LENGTH        |
