Poly Masking Tape
STUCCO MASKING TAPE

DESCRIPTION

Poly masking tape is based on durable, moisture resistant PE (polyethylene) backing with a rubber-based pressure-sensitive adhesive that bonds well to most surfaces. Designed to offer a high degree of conformability without excessive stretch. Easy tear edges for ease of application. UV resistant and performs well over a wide range of temperature (including cold) conditions.

PRODUCT APPLICATIONS

Preferred for use in exterior insulation and finish systems (EIFS) and as masking during stucco application. Can also be used for splicing PE films and surface protection.

NOMINAL VALUES

The following data are nominal values based on PSTC, ASTM and other standard tests. The data should not be considered as specifications.

Backing	PE
Adhesive	Synthetic Rubber
Tensile Strength (lbs./in. of width)	23 (100.7 N/25mm)
Adhesion to Steel (oz./in. of width)	85 (23.3 N/25mm)
Elongation (% at break)	75
Total Thickness (mils)	7.5 (0.19mm)
Color	Red

Suggested Temperature Resistance

Operating Temp. Range: +32°F to +160°F
(0°C to +71°C)

Application Temp. Range: +45°F to +120°F
(+7°C to +49°C)

Best results when applied at +65°F (+18°C)
