

333

WATER-BASED STENCIL FILLER

DESCRIPTION

333 stencil filler is specially formulated to work with all IPG 'Anchor' stencil products' adhesive to create a better bond to the substrate during sandblasting. This extra bond helps small, intricate designs to stay attached to the substrate to prevent lifting when sandblasting pressure is applied.

Water washable minimizes fumes, fire hazards and waste spills. Lasts twice as-long-as solvent based fillers.

COMMON APPLICATIONS

Designed for use with stencil tapes. On polished surfaces, it is recommended that a light coat be applied.

** For best results complete the job same day or within (24) hours max. otherwise clean-up can be difficult.
